EXPERIENCE

Visa Oct 2025 - Present
Software Engineer *Bangalore*

- Collaborated on a major **re-architecture** from a massive **Monolith** (Activiti BPMN & Polling Based) **to Segregated Event-Driven** (using *Custom **Self-Healing Active-Active Hazelcast Queues***) Processors of an ansible automation orchestration platform product, **reducing platform level execution overhead by over 60%**, and **reducing code-smell by 70%**
- **Designed** and **Implemented** a **Parking Lot** System for **in-flight migration of 100% of running executions** w/ **State Reconstruction** facilitating **Zero-Downtime deployment** of Event-Driven System.
- **Designed & implemented** a **Rate Limiter** based on **Token-Bucket**, **scoped at User/Global** level, **enforceable via annotation**, and **overridable via API**, which **eliminated DoS by internal applications** and facilitated elevated access for select users.
- **Developed** a **Cross-Region Dual-DC Job Scheduler** moving out of a Custom Misfire-prone Quartz Implementation, **reducing misfires to 0%** and **reduced trigger lag from ±20s to ±5s**.
- Discovered a **non-compliant** handling of **Change Life-cycle** within the application and **Proactively connected with ITSM team** to **document and remediate the flow**, **avoiding non-compliance penalties** & **impact**.

Société Générale Feb 2024 - Oct 2025
Software Engineer *Bangalore*

- Migrated multiple Excel-based VBA solutions to cloud functions written in Python, **reducing platform dependency by 100%** and wrote tests with **70%** coverage.
- Incorporated API based data-fetching for compliance, **decomposing intricate SQL queries** to redirect partial data source, while keeping the **response time overhead below 5%**
- Led migration of **100%** docker images from **Mirantis Secure Registry to Harbor** and wrote **Jenkins Scripts & Docker files** for updated workflow.
- Optimized DB scripts in **C-shell** and **pl/pgsql** through **parallelization** of independent business logic, **reducing runtime by 45%** (from 5.5 to 3 hours)
- Achitected multiple **On-Prem** applications on **Azure Public Cloud**, setting up **AKS, Azure PostgreSQL DB, DNS, Certificates, Key Vaults**, etc. and designed automation, **reducing deployment effort by 80%**
- Automated **90%** of the **Blue-Green Migration for AKS**, including resource migration, network redirection, and access re-provisioning, **improving migration efficiency by 300%**.

EDUCATION

B.Tech in Computer Science, Vellore Institute of Technology Sep 2020 - Aug 2024
CGPA: 8.99
DBMS, DSA, OOPs, Computer Networks, Machine Learning, Deep Learning, Operating System

SKILLS

Languages & Frameworks	Java, Python, C++, JavaScript (ES6), Spring Boot, FastAPI, Express.js, Angular, React, Activiti BPMN, Quartz Scheduler
DBs, Caching & Analytics	PostgreSQL, MySQL, ClickHouse, Hazelcast, Ehcache
Cloud & DevOps	Microsoft Azure (AKS, Key Vault), Multi-Region Distributed Systems, Active-Active Architecture, Docker, Kubernetes, Ansible (AWX), Jenkins, GitHub Actions
Build, Test & O11y	Maven, JFrog, uv, Git, Bash, JUnit 5, Grafana
AI Engineering	Model Context Protocol (MCP), LLM SDKs, A2A

PROJECTS

KoDS Bot. Discord bot for managing an RPG game-based guild of 300+ members.

- Designed systems for profile creation, inventory management, and reputation system.
- Included tags system, bio and status system, and utility commands for moderation.

LEADERSHIP

- Led major migrations (**Nexus Repo** to **JFrog**, **Jenkins** to **Github Actions**, **On-Prem** to **Azure**) for my team at **Societe Generale**
